

## Owning Shares Made Easy

Managed Portfolios let you own direct shares without all the usual administration. They come with the added benefits of being professionally managed and can also provide access to investments not readily available to individual investors.

### What is a Managed Portfolio?

A managed portfolio is a professionally managed investment portfolio, which can be made up of shares, cash and other listed securities. Unlike a managed fund, with a managed portfolio, you are the beneficial owner of the underlying securities. The many benefits of managed portfolios are detailed overleaf. Below compares the advantages of a managed portfolio with a direct share portfolio and a managed fund.

Feature	Managed Funds	Direct Share Portfolios	Managed Portfolios
Professional Management	✓	✗	✓
Transparency	✗	✓	✓
Direct Ownership of Assets	✗	✓	✓
Portability of Shares (without triggering CGT)	✗	✓	✓
Tax Advantages of Ownership (no inheritance of capital gains from others)	✗	✓	✓

The benefits of owning direct shares, without all the hard work.

## Advantages of a Managed Portfolio

### Benefit for You

#### Professionally Managed Investment Portfolios

You get access to a low cost, actively managed investment portfolio, managed by Morningstar's global team of investment professionals. So you won't have to spend time researching stocks or continuously managing and monitoring your investment portfolio.

#### Transparency

You can see exactly what shares, cash and other listed securities you hold at any given time.

#### Tax Advantages

As the portfolio is owned by you, you don't inherit any embedded unrealised or realised capital gains. And capital losses can be used to offset gains from other assets.

#### Reduced Administration

With one application process you buy an entire portfolio of securities. There's no need for manual re-weighting, buying or selling as this is part of the service provided by the professionals managing the portfolio.

This means less paperwork and a more streamlined process if you want to implement any changes to your investment strategy.

#### Centralised Reporting

You get all the information you need about your investment in one report. Your adviser can customise the level of detail that goes into your report so you're getting exactly the information that you want.

You get reports at the portfolio level or at an individual security level. At an individual security level it's possible to have performance and reports in real time.

#### Everything In One Place

You can keep on top of your investment holdings by being able to access everything in the one place.

## Two Sets of Specialists, One Goal

Your financial adviser plays a vital role on your path to financial security. From helping you plan for the lifestyle you want, to connecting you with the options that are right for you. Your financial adviser will assess your current situation and identify your financial goals and objectives, as well as establish the level of risk you're comfortable taking to achieve these goals. Based on your financial goals and objectives as well as your risk tolerance, Morningstar provides a solution to help you achieve them.

Morningstar Managed Portfolios have been designed to meet the needs of investors, whatever your financial goals, risk profile and life stage.

## Diversified Managed Portfolios

Morningstar's Diversified solutions are your gateway to Morningstar's asset allocation, security selection, portfolio construction, and research capabilities. Morningstar's disciplined investment process combined with strategic implementation ensures you are invested in suitable investment opportunities. These investment solutions have been designed to align with the needs of investors; increasing wealth, while aiming to preserve capital through every stage of the market cycle.
